EDUCATION

Boğaziçi University Istanbul, Turkey

B.S. in Computer Engineering — GPA: 3.25 / 4.0

Sep 2021 – Jun 2026 (Expected)

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database, Computer Organization, Systems Programming, ML, Cloud Computing, Computer Networks, Cryptography, Embedded Systems Design, Game Programming, Automata Theory, Systems Simulation, Operations Research

Senior Design Project — Boğaziçi University

Istanbul, Turkey

Performance Evaluation of LLM Inference Frameworks

2025 – 2026

- Benchmarked vLLM inference performance across quantization methods (FP16, FP8, INT4) and model types (reasoning vs. non-reasoning) under concurrent load; analyzed latency, throughput, cost efficiency, and model quality trade-offs.
- Built an end-to-end automated benchmarking pipeline using Locust, Prometheus, and Grafana; deployed on Kubernetes (GKE) with full cloud-native observability.

WORK EXPERIENCE

Siemens

Istanbul, Turkey

Part-Time Software Developer

May 2025 – Present

- Contributed to integrating a custom Debian-based OS image into Siemens industrial PCs using an ISAR-based pipeline; wrote BitBake recipes and YAML configurations to define image layers, packages, and build targets.
- Built and maintained GitLab CI/CD pipelines to automate OS image compilation, test execution, and artifact delivery, reducing manual build overhead.
- Developed system level tooling and deployment scripts in Go for image configuration, service management, and hardware abstraction on embedded targets.
- Applied virtualization techniques (QEMU/KVM) to validate OS images in sandboxed environments prior to hardware flashing, enabling faster iteration cycles.
- Executed hands-on hardware validation tests on industrial PC prototypes, verifying driver compatibility, peripheral behavior, and boot reliability on target devices.
- Worked within Agile/Scrum framework with three-week sprints, participated in sprint planning, daily stand-ups, reviews and retrospectives in a cross-functional team.

IQB Solutions

Istanbul, Turkey

Software Development Intern

Aug 2024 – Sep 2024

- Developed backend modules focusing on relational database management, RESTful API integration, and token-based authentication (JWT/OAuth2) using Java, Spring Boot, Maven and Postman.

EXTRACURRICULAR ACTIVITIES

COMPEC: Technology Committee Member

Oct 2021 – Present

- Actively contributed to the Technology Committee; helped organize TechSummit'22 and TechSummit'23, including planning and execution of workshops and seminars.

SKILLS & INTERESTS

Languages: English (Advanced) | Turkish (Native) | German (Elementary)

Programming: Go, Python, Java, C

Infrastructure & DevOps: Docker, Kubernetes (GKE), GitLab CI/CD, Prometheus, Grafana, Git, Azure, AWS, JFrog, Agile/Scrum

Cloud & Databases: Google Cloud Platform (GCP), RESTful APIs, SQL/Database Management

Game Development: Unity, C#, Design Patterns, Performance Optimization

Interests: Long-distance running (47th Istanbul Marathon 4:21 Finisher), Swimming, Fitness
